

RFID Holder for RFID cards-spec sheet

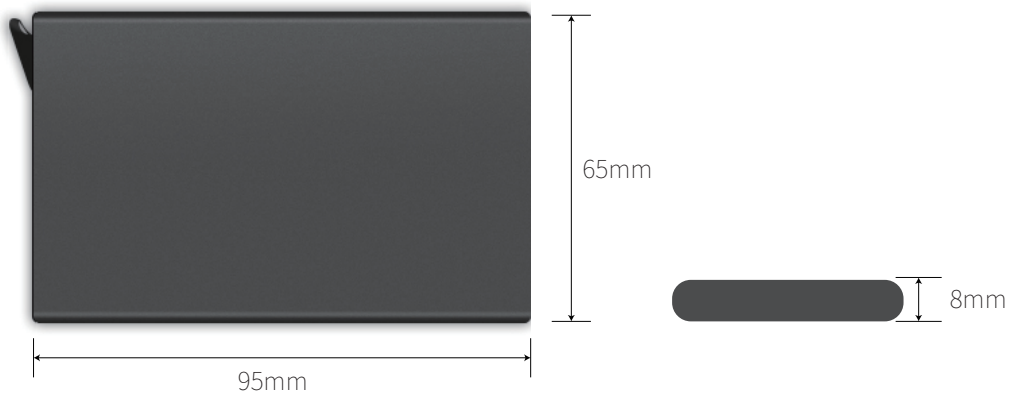

RFID holder looks like a simple metal case, mediocre and inconspicuous. But it like Faraday cage made of complete metal, when you put your RFID cards in it, the RF signals will not be disturbed by the external RFID reader. In short, it is a security RFID protector for your RFID credit card or debit card.

The most special thing about this RFID holer is that it has a unique switch design. As long as you gently press the bottom switch, the credit card will pop up step by step, very convenient. If you want it to be more personalized, you can customize it. We can engrave all kinds of patterns or logos for you.

Parameters
